VIP™ Media Server Pro 2

VIP Media Server Pro 2 is a turnkey system for delivering content to video presentation devices including CHAUVET Professional MVP and PVP panels. It is designed as a standalone complete solution for the video professional. VIP Media Server Pro 2 comes optimized to run CHAUVET LED Studio software (for panel addressing and control) and Arkaos MediaMaster software (for content playback and triggering). For performance and stability, the operating system runs on a SSD (solid state drive), and also utilizes dual 500GB RAID1 hard drives for storage, which gives the protection you need when "the show must go on" In addition to all of the features of the original VIP Media Server, the Pro version includes more audio/video inputs/outputs/throughputs, as well as video sync support.
